Dear Judge Brown:

The autopsy studies on J. D. Tippett, 39 year old white male on whom you authorized an autopsy November 22, 1963, have been completed. The cause of death is found to be gunshot wounds of the head and chest. There was extensive damage to the brain as well as penetrations of the lung and liver with massive hemorrhage.

Routine studies will be done and in the event anything more of significance is encountered, you will be immediately notified.

With kindest personal regards,

Very sincerely yours,

Karl F. Ross, M. D.
